

Who Am I?

Hey, I'm Mohamad Aldalati, a 19-year-old from Syria with a passion for backend development, particularly in PHP. I'm currently honing my skills in the HZ ICT program, while balancing part-time jobs at Domino's and Studentaanhuis. My strengths include planning, leadership, and problem-solving, though I'm working on overcoming my perfectionism. Outside of coding, I enjoy swimming, video games, and helping people with tech issues. My goal is to become a security or software engineer after completing this program.

Mohamad Aldalati

Good morning to everyone except people who hate PHP.

Why ICT?

I chose the HBO-ICT program because it aligns with my passion for technology and career goals in cybersecurity, back-end development, and penetration testing. These fields fascinate me due to their intellectual challenges and potential for enhancing system security and efficiency. Through this program, I aim to acquire the technical skills and practical experience needed to excel. My goal is to develop expertise that will enable me to make a meaningful impact in the ICT industry.
